

LITE PAPER: DICKYCOIN (\$DICKY)

"The coin that always stays up"

1. THE CONCEPT: WHY \$DICKY.

Dickycoin is born on the SUI network with a clear mission: to bring humor and mischief back to the ecosystem. We are not a scalability solution or a revolutionary DeFi platform; we are a blue character with glasses, wings, and an aerodynamic structure designed for only one thing: **to always go up**.

We do not have the official seal of SUI (yet), but we were born with the firm intention of earning it meme by meme. We are not the mascot that SUI chose, but we are the mascot that SUI deserves.

2. TOKENOMICS (NO TRICKS, JUST SIZE).

Transparency is our base (and it is very round). We have designed a structure where the community is the true owner of the movement.

- **Total Supply:** 1,000,000,000 \$DICKY.
- **Token Distribution:**
 - **85% Initial Liquidity:** Deposited in the DEX (Cetus) for the public launch.
 - **15% Creators Reserve:** Intended for the founders to finance marketing, project development, and **responsible** profit-taking.
- **Investor Security:**
 - **LP Burn (Liquidity Burn):** The tokens that give access to the SUI pool were permanently destroyed by being sent to a 0x0 address (**burn address**). No one can withdraw the floor of the project.
 - **Contract Renunciation:** Once launched, we cannot issue more tokens or modify the rules.

3. ROADMAP: THE PATH TO THE TOP.

Size matters, but direction even more. Our plan is divided into organic growth phases:

- **PHASE 1: The Warm-up.** Creation of the community on X and deployment of the meme army.
- **PHASE 2: The Penetration.** Official launch on Cetus, liquidity burn, and contract renunciation. Dickycoin becomes free and sovereign.
- **PHASE 3: The "SUUUUUI" Moment.** Massive adoption. We want that, when someone thinks of SUI and fun, the first thing that comes to mind is our blue silhouette. The goal is to be so big that ignoring us is impossible.
- **PHASE 4: Expansion.** Search for listings on price aggregators and collaborations with other projects in the SUI ecosystem.

4. PROFIT PHILOSOPHY.

As creators and managers of the community, we are in the same boat as you. We will take profits in an **organic and staggered** way for the benefit of the project from our 15% reserve used for marketing and development. We will never perform massive sales that break the chart or the dream of the community. If \$DICKY goes up, we all win.

5. DISCLAIMER

\$DICKY is a memecoin with zero utility created for entertainment purposes.

Cryptocurrencies are highly volatile. Invest only what you are willing to lose in a night of someone else's love.
